ABOUT ME

Hey! I'm a 22 and I'm Engineer, volleyballer, amateur astronomer, and sci-fi lover. I have been passionately learning backend development for the past year. What I lack in experience - I compensate with hard work & passion for evolving. Also I'm open to new opportunities and ideas. Finally, I'm looking for opportunities to put acquired skills to good use, while bringing tangible benefit to my future employer!

EXPERIENCE

Python developer

None   Nov 2021 – Present

Implemented two training projects using Python Django & DRF, also wrote scripted applications based on API like a web and telegram chats parsers, which are in my GitHub.
I know OOP and the principles of writing code. I actively work with SQL, Linux, Git and use Docker and Pytest in my projects.

Junior Frontend developer

Humandone.com   Jun 2021 – Oct 2021

Layout and animation using HTML/CSS and JS of the main page of the company's website. Working with layouts in Figma. Support and editing of existing projects. Development of front-end applications, work with Git.

EDUCATION

University

Belarusian National Technical University   Sep 2019 – Present

I am studying as civil design engineer in a part-time form.

Courses

As part of self-study, I took Python courses on Stepik, listened to lectures on algorithms by Timofey Khiryanov. I read Aditya Bhargava's Grokking Algorithms and solve problems on Codewars. I also study GoLang as my second professional language.
